

Hose Identification Guidelines

1. **Application for use:** What purpose does this hose perform?
2. **Working Pressure:** What is the pressure rating of the hose, or is it a vacuum hose with suction?
3. **Routing/Orientation:** Any objects or extreme bends we should know about?
4. **Temperature:** Is this hose going to be used next to direct heat or in a high heat environment?
5. **Working Environment:** Is this hose subject to abrasion, heat, chemicals or any other environmental hazard?
